COVER LETTER:

To Whom it may concern:

The recent rapid demand on the U.S. health system demonstrates that there is a healthcare burden that is not sustainable, especially during emergency events, such as those caused by environmental disasters. During a crisis, access to critical PPE and Medical Supplies experience the greatest risk. Those providing emergency health and safety services are exposed to the same disasters, while serving an overwhelming demand by their local community access to critical PPE and Medical Supplies services are quickly exhausted by the intense workload.

AGX is committed to delivering services and to continuity of operations to meet the needs of all our client partners. We will continue to monitor the situation and as things change, we will provide additional updates. We are here for you! AGX will continue to pay close attention to what our State and Federal officials and the CDC are recommending.

Team AGX houses a group of environmental management consultants, with significant expertise and experience in managing similar missions, in addition to environmental management work. Team AGX has, over the past 6 years, assembled a cadre of experts that have been actively engaged in performing certified medical device product design, contract manufacturing, supply chain management services of equal or greater scope as herein specified for a scalable supply of critical PPE and Medical Supplies for the Great State of Maryland!

CuXr MASK Construction

CuXr MASK [mc] (aka "**CureX**") is a reusable self-disinfecting anti-viral cloth mask that has been designed and developed by Maryland-based Medicos Consultants, LLC. We have partnered with several Baltimore-based prototyping, testing and manufacture companies that can immediately go into high-volume local production of the MD Masks using already sourced regionally available materials.

MD Mask ("Maryland Mask") Construction:

- Two-Ply Copper Cloth Construction
 - Outer Liner: Weave 55% Cotton 45% Cupron Polyester
 - Inner Liner: Knit 55% Cotton 45% Cupron Polyester
- Augmented 8" Filter Pocket for Increased Anti-Viral Effectiveness
- Modular Strap Design
- Custom Color or Copper Piping
- Customizable Outer Liner Construction
- Copper Cloth is Self-Disinfecting (0-2hr Timeframe) *depending on filter configuration and fabric weave
- Copper Cloth Blend Neutralizes COVID-19 virus, RNA Viruses (e.g. Corona Virus, HIV), DNA Viruses (e.g. Herpesviridae, Adenoviridae, Papillomaviridae), Bacteria and Fungi

CuXr(aka "**CUREX**") **Washing Instructions:**

Wash the CERM type facemasks, at least twice, using regular home detergent prior to use and then wash regularly / daily after use. Hot water washing and the use of chlorine bleach is highly recommended for regular post-use washing. Do not use any fabric softeners in wash or dry (e.g. dryer sheets) cycles.

Your mask has already been washed twice and is ready to use. Suggest it is washed daily to ensure it is clean to use. Be sure to put your name on it with magic marker. Be Safe and Stay well!

CuXr(también conocida como "**CUREX**") es una máscara de tela antiviral autodesinfectante reutilizable que ha sido diseñada y desarrollada por Medicos Consultants, LLC, con sede en Maryland. Nos hemos asociado con varias empresas de fabricación de prototipos, pruebas y fabricación con sede en Baltimore que pueden dedicarse inmediatamente a la producción local de alto volumen de las máscaras MD utilizando materiales disponibles en la región.

Construcción de la **CuXr**(también conocida como "**CUREX**")

- Construcción de tela de cobre de dos capas
 - o Forro exterior: tejido 55% algodón 45% poliéster cupron
 - o Forro interior: Tejido 55% Algodón 45% Poliéster Cupron
- Bolsillo de filtro aumentado de 8 "para mayor efectividad antiviral
- Diseño de correa modular
- Color personalizado o tubería de cobre
- Construcción de revestimiento exterior personalizable
- La tela de cobre es autodesinfectante (marco de tiempo de 0-2 h) * dependiendo de la configuración del filtro y el tejido
- La mezcla de tela de cobre neutraliza el virus COVID-19, los virus de ARN (por ejemplo, el virus Corona, el VIH), los virus de ADN (por ejemplo, Herpesviridae, Adenoviridae, Papillomaviridae), bacterias y hongos.

Instrucciones de lavado de **CuXr(también conocida como "**CUREX**):**

Lave las mascarillas tipo CERM, al menos dos veces, usando detergente casero habitual antes de usar y luego lave regularmente / diariamente después de su uso. El lavado con agua caliente y el uso de blanqueador con cloro son muy recomendables para el lavado regular posterior al uso. No utilice suavizantes de telas en ciclos de lavado o secado (por ejemplo, sábanas de secado).
